

## MODULINK FINISHES

We offer a selection of surface finishes for our furniture lines. Our catalogue is based on the use of LPL Melteca finishes, which is a durable melamine surface over a substrate, finished with PVC to finished / seen edges.

To complement our range, we can also offer on request, various surfaces from, alternative brands of LPL finishes, HPL (Formica) surfaces, wood veneers in a variety of species, or even plain MDF board finished to your requirements.

Edgings can range from a raw sanded edge, PVC, or timber clashed to specified dimensions.

Finishes can be as mentioned, from our prefinished range, painted to your colour choice, stained and lacquered, or simply finished with "Penetrol Oil".

Our range of standard LPL Melteca finishes can be seen on the following pages.
